

When should I use Provox Life™ Protect?

Provox Life™ Protect is designed to be used when you are away from home and need extra protection with comfortable breathability.

You can use it in the following situations and many more:

Enjoying the Bonfire Night fireworks

Socialising with family and friends

Going Christmas shopping

Taking part in festive gatherings

Visiting crowded places

Going to doctor's appointments

"I talk better using the Protect HME."

PROVOX®
Life Breathe better,
whatever you do

Staying protected during winter with Provox Life™ Protect

98% filtration efficiency to help you stay well this winter.*

Enjoying the festive period whilst staying protected

As the winter months approach, we're sure that this year you want to make the most of the festive period.

To help you stay safe whilst out and about, Provox Life™ Protect HME was designed to give you extra protection in busy places with large crowds such as:

- Bonfire celebrations
- Shopping centres
- Christmas carol shows

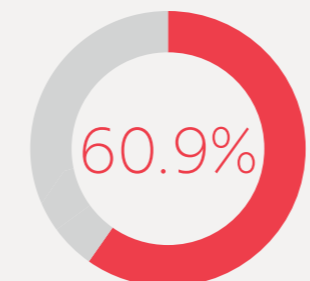

Moreover, Provox Life™ Protect HME has a soft and smooth button for easier occlusion of your stoma so you can make yourself heard, wherever you are, whether that's in a noisy shopping centre or outside in your local park watching the fireworks.

*Please note: Since pathogens can enter and leave the human body in other ways (such as the mouth, nose, and eyes), Provox Life™ Protect HME can never guarantee complete protection. Please read the instructions for use for guidance.

Looking after your lungs with Provox Life™ Protect HME

Provox Life™ Protect HME is a Heat and Moisture Exchanger (HME) combined with highly effective electrostatic filter that protects against airborne particles, including viruses and bacteria, with a filtration efficiency of more than 98%*.

It works to warm and moisten the air that you breathe to keep your lungs humidified which is especially important in the winter months as the air tends to be colder and drier.

IMPROVED BREATHABILITY

60.9% of users reported that Provox Life™ Protect is easier to breathe through than Provox® Micron.**

**Provox Life™ Experience Program, 2021, Data on file.

Layering your Provox Life™ Protect HME with a laryngectomy protector (a 'bib') and a scarf can help to offer extra protection from the winter cold.

Request a call-back today!

I would like to receive a call back from the Atos Customer Care Team to discuss using Provox Life™ Protect.

As always, talk to your Clinician about which products are right for you.
